Key features of Freedom Elite for group schemes

Freedom Elite is a private medical insurance plan from Freedom Health Insurance that covers the cost of private medical treatment needed to treat an unexpected acute illness or injury that first arises during a period of insurance.

All Freedom Elite group schemes must include the core cover as standard. This covers inpatient and daypatient treatment, certain pregnancy complications and dental surgical procedures, MRI, CT and PET scans, home nursing, private ambulance and NHS cash benefit. The core cover also includes full cancer cover. For more information about our cancer cover, please ask for a copy of our Cancer Cover Explained leaflet.

Freedom Elite also offers a number of optional benefit packages for outpatient cover and other additional benefits, a choice of two hospital bands and a range of excess options.

Summary of cover

This shows the type of treatment costs that can be covered under Freedom Elite and the limits that apply. Unless otherwise shown, all treatment must be carried out by, or under the direct control and supervision of, a specialist following referral from a General Practitioner and all benefit limits apply per insured person, per period of insurance.

More information on the benefits of Freedom Elite can be found in chapter seven of the Group Member's Guide to Cover.

Pre-existing conditions, acute conditions and chronic conditions

Private medical insurance (PMI) is designed to meet the cost of elective, short-term medical treatment provided by a specialist that an insured person needs because they are suffering from an unexpected acute condition that first arises during a period of insurance. This means we do not cover pre-existing conditions or chronic conditions.

A pre-existing condition is a medical condition an insured person had before their cover with us started. We will not cover a medical condition, or a related condition, an insured person had within the five-year period before their cover with us started unless we have agreed to cover that condition. For further information about how we exclude cover for pre-existing conditions, please read chapter 11 of the Group Member's Guide to Cover.

An acute condition is a disease, illness or injury that comes on suddenly and without warning, unexpectedly causing pain or discomfort or other outward physical symptoms. An acute condition will tend to respond quickly to a short period of treatment leading to a full recovery, restoring the insured person to the same state of health they enjoyed before they suffered from the acute condition. There should be no need for prolonged or long-term future treatment. PMI is only intended to cover treatment of acute conditions.

A chronic condition is the opposite of an acute condition. It is persistent and long-lasting in its effects and, in most cases, cannot be cured and only kept under control, perhaps by medication or diet or a change of lifestyle. Chronic conditions are often life-long and limiting in terms of quality of life. Our leaflet, Chronic Conditions Explained, gives more detailed guidance on how we look at claims for chronic conditions. It contains some typical case studies. You can get a copy of the leaflet from our website at www.freedomhealthinsurance.co.uk or by contacting us.
